Advancing Student Mental Health at Community Colleges: Research, Practice, and Pathways Forward

Inspired by CCMH membership and the collaborative CCMH/Hope Center March 2026 report comparing counseling centers housed within two-year/community colleges and four-year institutions, this webinar explores the unique mental health needs and counseling services offered at community colleges nationally.

Panelists will discuss data-informed decision making within community college systems, reducing stigma, expanding access to care, addressing the needs of commuter-based students, enhancing participation in national professional organizations, and coordinating support across campus and community partners. Participants will leave with practical ideas for advocacy, collaboration, and building sustainable, student-centered care within community college systems.

Hosts:

Eitandria Tello, M.A., LPC-S - Student Advocacy Team Lead - Mental Health, Training, and Community Resources, Alamo Colleges District

Brett Scofield, Ph.D. - Executive Director, Center for Collegiate Mental Health (CCMH), Penn State
